

NEED HELP ACHIEVING YOUR SUSTAINABILITY GOALS?

WON'T BREAK DOWN
ON DISPLAY

GLOSS FINISH
EASY TO APPLY

FULLY BIODEGRADABLE
NO TOXIC MICROPLASTICS

Bioguard 80® is a specially formulated, fully biodegradable, film featuring the same application technique and level of protection as Bookguard.

FEEL THE DIFFERENCE

Our active biodegradable ingredient results in a slight texture to Bioguard 80®. This texture does not affect the level of protection to your book.

It makes it easy for you, your team and your visitors to identify which books in your collection are covered in Bioguard 80®.

This means when disposing of your book, it can safely be identified as having Bioguard 80® covering.

Independent tests & certifications prove Bioguard 80® commences biodegradation only when placed in landfill or compost.
